이은하 / Eunha Lee

(Age) 2002.02.08

(email) eunhalee@korea.ac.kr

(mobile) 010-9213-9180

(Research Interests) Bio AI, Drug Discovery, Drug-Target Interaction (DTI), Proteomics, ADMET Prediction

Education

- M.S. in Computer Science & Engineering Department, Korea University (Sep 2025 ~ Present)
- B.S. in Biosystems and Medical Sciences (Double Major: Korean Language & Literature), Korea University (Expected Aug 2025)

Academic Performance

- GPA : 4.06 / 4.5
- TOEIC : 830

Research Experience

- AI Researcher, ARPA-H Korea Project "AI-based High-efficiency Proteomics for Multi-cancer Biomarker Discovery" (LC–MS/MS 기반 다중 암 진단 바이오마커 개발)
- Undergraduate Research Intern, Aging, Metabolism and Physiology Lab, DGIST (Dec 2023 ~ Feb 2024)
- Member, Disease Study Society (DSS), Korea University (Mar 2024 ~ Dec 2024)

Publications

- Hajung Kim, **Eunha Lee**, Sohyun Chung, Jueon Park, Seungheun Baek, Jaewoo Kang, "ATTNSOM: Learning Cross-Isoform Attention for Cytochrome P450 Site-of-Metabolism", *ISMB (2026)*

Work Experience

- Intern, AIGEN Sciences (Feb 2026 ~ Present)

Projects

- LLM-based Hypothesis Generation Benchmark
- Cancer Survival Analysis using Clinical Data
- ADMET Prediction using CYP Enzyme Modeling
- LC–MS/MS-based Proteomics & de novo Peptide Sequencing
